

I am writing to you in regards to the possible decision to have LPFM stations take priority in my local area over FM translator service. Specifically, I have a station that I listen to almost exclusively, that station is AIR1 heard on 91.5. Until AIR 1 came to town there was only one other Christian station and they played more contemporary music which only appeals to a select group of people. AIR 1 is a blessing to me and my family as well as they provide music that has a positive message which is rare these days. There are many people out there that might listen to this type of music that wouldn't normally listen to Christian music. If AIR 1 were to be removed from our local station we lose a positive commercial-free influence in our community. Also, there is a good chance that the LPFM programming that took it's place would be working for a profit and more than likely not provide the quality of entertainment that AIR 1 provides. It is in all of our communities interest to have the broadest range of programming and entertainment to choose from especially one that provides uplifting entertainment all concerned with making someones day brighter.
